

MATRUSRI COLLEGE OF ENGINEERING

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

Template & Guidelines for preparing the Project Report for B.E. VIII-SEM

1. Title (Plz refer a previous project report from Dept. Library/Main Library)
2. Certificate from College (on a letter head, signed by the Head and the Int. Guide)
3. **Certificate from the Company** (Where the Project is done. e.g. TCS/WIPRO)
4. **Declaration** (Given by the Project team member's)
5. **Acknowledgment** (Given by the Project team member's)
6. **Abstract** (One Page only). Abstract is the brief overview of the Project.
7. **Contents** (with page numbers)
8. **List of Figures**
9. **List of Tables**
10. **Introduction** (2-3 pages)
11. **Literature Survey** Existing Different Approaches. (About 10-20 pages and should be specific to your project.)
12. **System Analysis**
 - Problems with Existing System
 - Proposed System
 - Process Logic
 - Feasibility Study (Technical, Economical & Operational)
 - Effort, Duration and Cost Estimation using COCOMO, Function Point. (Exhaustive theoretical description of COCOMO, Function Point should be avoided)
13. **Software Requirement Specification** (as per any IEEE Std. of your choice, preferably IEEE std. 830-1998.)
14. **System Design**
 - System Architecture
 - Data Flow Diagrams
 - Flow Charts
 - UML diagrams(All the diagrams should be drawn. Diagrams should be well documented.
 - If the project is Hardware related or on Embedded Systems, then the circuit diagram etc of hardware should also be included.

15. Implementation

(The complete Source code should not be included. Important Interfaces/classes/functions should only be included. In case, if the organization does not permit you to take the source code outside, then the Pseudo code shall be included.)

16. Testing (Should show how the software is tested. You can include the test cases for Unit & Black Box testing.)

Wrong practice: Students usually write about Unit Testing, Integration Testing, Black Box Testing etc. i.e. they write about Testing Techniques in Software Engineering!! **This should not be done.**

17. Screenshots:

(This is the GUI of the System. You can include a few important Screenshots with explanation.)

18. Conclusion (One Page)& **Future Enhancements** (One Page if required)

19. Bibliography/References (Should be in IEEE Format. You can include the names of Research Papers, Websites, books etc.)

Example:

1. J. Gaffney, "On Predicting Software Related Performance of Large-Scale Systems," *CMG Proceedings*, Philadelphia, 1984.
2. Roger S. Pressman, "*Software Engineering – A Practitioners Approach*, 6th Edition ," Tata McGraw Hill, 2004
3. <http://www.cmu.edu>

Brief Guidelines:

1. The project report should be neatly typed on one side and in A4 size Bond paper only.
2. All the pages should be numbered and bottom centered
3. The general text should be typed with 1.5 line spacing.
4. The general text shall be justified and typed in the font style, Times New Roman and font size-12.
Giving unnecessary blank spaces to increase the size of project report is strictly prohibited.
5. Headings should be typed in the font style, Times New Roman and font size-16 and bold.
6. Sub-Headings should be typed in the font style, Times New Roman and font size-14 and bold
7. Every chapter must start in a new page. Every figure and table should have serial number. Ex: Fig: 1.1, 1.2 etc, where the first digit represents the chapter, the second digit represents the figure number/table number.
8. The project execution must be shown to the internal guide before the submission.
9. The students are requested to show the draft copy of the Project report to concerned Internal Guide before printing.
10. The Internal Guide followed by the Head shall sign the Project report.
11. Three copies of project report should be submitted to the college. If three students are working on a project, five copies should be printed – Three copies for students & two for the dept). Soft copies (in CD's) of the project and documentation should be submitted.
12. The students are advised to report to their respective internal guides immediately.
